

Introduction

Greenstar operates best-in-class integrated waste collection & transfer, recovery & recycling activities through the operation of a network of state-of-the-art Materials Recovery Facilities (MRF's) around the country combined with modern fleet logistics, skips and bins. We provide tailor-made waste management services to match individual customer requirements and offer the widest range of equipment, skips and bin sizes in the market (see separate insert). Greenstar has an ongoing investment program to develop new MRF's in addition to expanding and enhancing our existing facilities, equipment and vehicle fleet to offer Irish businesses and industry flexible collection, transport, recycling and residual disposal at competitive prices.

Greenstar offers customers peace of mind by delivering a fully automated 'cradle-to-grave' audit trail of your waste through our bespoke IT operating system WIMS. Our continuous investment in infrastructure and developing new technologies ensures that Greenstar can maximise the volume of recovered and recyclable materials from client waste streams reducing your disposal costs in an environmentally compliant manner.

Our team of waste management experts will be happy to advise you on the best waste management solution to meet your needs.
