

### Introduction

Greenstar have set the standard in the operation of recycling programmes to maximise the recycling and recovery of C&D waste.

These programmes have been customised for a range of construction programmes from residential, commercial sites right through to the construction of some of the largest state-of-the-art advanced manufacturing facilities in Ireland. Our expert team will conduct a waste audit on each construction site to establish waste arisings and to recommend a tailored waste management programme to ensure the separation, re-use, recycling and disposal of various material from site.

These services allow our clients to utilise recycled aggregate reducing transport costs and the need to use virgin material.

These services allow our clients to make significant savings by reducing disposal costs and ensuring compliance with legislation in an environmentally sustainable way.

### Industry Needs

- Outsourced Management of all Waste Materials
- Regulation Compliance
- Experienced and Loyal Partners
- Cost Reduction/Minimisation
- Certification
- Cost Efficiency
- Compliance

### Added Value for our Clients

- On-site audit

- Full audit trail from source to end-user
- Minimised landfill usage
- Reduced costs
- Recycling certification
- State of the art facilities
- Social responsibility
- Environmental department

### Greenstar's Process Flow

### Materials Managed

- Concrete
- Asphalt
- Tiles
- Bricks
- Wood
- Clay
- Metals
- Crushed Stone
- Excavation Soil

## Before Greenstar

- Mountains of loose materials dumped at the back of the site
- No segregation
- All materials generated destined to landfill
- Poor utilisation of premium space
- Regular and expensive litter fines
- Attraction of vermin
- Unhappy residents locally

## Greenstar Invited to Tender

- Detailed site audit
- Recommended model for the future

## Greenstar Client Partnership

- Aesthetically pleasing sites
- Environmentally compliant
- Certificated and traceable waste streams
- Full on-site segregation
- 5 different skips
- One waste management provider
- Regular consultancy and advice on new streams
- Partnership with the best full-service provider
- Dedicated team of managers
- Legislative changes communicated ensuring up to date compliance

## Results

- 30% Cost reduction
- Social and fiduciary responsibilities catered for
- Peace of mind – release of management time
- Total Compliance
