

Introduction

Greenstar provides a comprehensive range of on-site recycling services to cater for a wide variety of industries from office recycling programmes through to customised recycling programmes to some of the largest global players in the manufacturing, food & beverage, electronics and pharma-chem industries.

Our expert team will set up the infrastructure for on-site segregation, collection, storage of materials as well as providing complementary off-site services including recyclables trading and full monthly reporting on the full waste audit trail.

We advise our clients on the best practices in relation to recycling and minimisation as well as provide a range of education and awareness services.

These services allow our clients to make significant savings by reducing disposal costs and ensuring compliance with legislation in an environmentally sustainable way.
